

Superior TLS through ZixGateway®

Reducing TLS Limitations & Enhancing Email Security

Who Trusts Zix with Their Data?

More than 14,000 customers including:

- All Federal Financial Institutions Examination Council (FFIEC) regulators
- The U.S. Securities and Exchange Commission
- Seven divisions of the U.S. Treasury
- One in four U.S. banks
- One in five U.S. hospitals
- More than 30 BCBS organizations

Benefits:

- Secure, transparent methods for senders and receivers
- Reduced costs and resources for mandatory TLS
- Increased control and unrivaled visibility
- Added confidence with security branding

Features:

- Policy management of TLS
- Integration of TLS in Best Method of Delivery
- Secure email and replies

As an alternative to encrypted email, some organizations try to reduce the risks of unsecure email by implementing Transport Layer Security (TLS). The two traditional TLS methods have advantages and disadvantages. Mandatory TLS is the safer method but requires manual set-up of each TLS connection, which is cumbersome, costly and time consuming. Opportunistic TLS does not have the time or resource costs but sends email in plain text if a TLS connection is not in place, introducing significant security and compliance risks. Regardless of the method, neither can ensure secure reply.

A Superior Solution

Zix delivers superior support for TLS by integrating it directly into ZixGateway encryption policies, enabling the addition of TLS as a delivery method by simply checking a box. In addition, Zix incorporates TLS in the Zix Best Method of Delivery®, which provides failover methods that maintain the flow of email, ensure secure exchange and guarantee secure replies.

TLS through ZixGateway also provides exclusive benefits not available with any other competing TLS solutions, including:

- Increased Delivery Control – No longer is TLS all-or-nothing. By making TLS a part of the ZixGateway policies, TLS is used only where appropriate.
- Reporting Capabilities – Not available with conventional TLS methods, ZixGateway offers reports tracking each message for compliance officers.
- Security Branding– A “Secured by ZixCorp” note embedded in each message provides added confidence for your recipients.

Eliminate the limitations and reduce the risks of conventional TLS offered by other vendors and leverage the benefits of “safe” TLS support through ZixGateway.
